Innovative Carpet Tiles

COLLECTION
2019

ABOUT INCATI

INCATI stands for Innovative Carpet Tiles.

We design, manufacture and service high quality modular flooring solutions for global commercial customers in the office, hospitality, education and healthcare sectors.

Part of Tapibel, Belgium, a manufacturer of needlefelt and tufted carpet, our heritage traces back nearly 50 years.

As a family owned business, we strive for excellence in product quality, customer relationships and providing an all-inclusive service throughout your project with us.

Get inspired by INCATI!

COMPANY VALUES

INCATI's main focus is to develop and manufacture innovative carpet tiles that are durable, functional and sustainable.

Our knowledge about raw materials and new production technologies allows us to continuously invest in product improvement, while following ethical and environmental practices.

WHY CARPET TILES

- Create your own unique floor space; mix different styles and colours or textures
- Choose standard size 50 x 50cm or go wild on different shapes, the layout options are endless
- Carpet tiles offer greater underfoot comfort, wear-resistance, acoustic performance, safety and improved air quality
- Modular flooring is easier to transport, store, install, maintain and replace
- Tiles have a waste factor of only 5% compared to average 15% for wall-to-wall carpet
- ECONYL® regenerated nylon is the perfect answer to specifying sustainable flooring solutions

INCATI SETS SAIL WITH ECONYL® BRAND

TO EXPLORE A NEW WORLD OF INFINITE REGENERATION

We are proud to announce that a large percentage of our Myriad-made collections is manufactured from **100% sustainable ECONYL® BCF yarn**. Another important measure to decrease INCATI's environmental impact. ECONYL® yarn is a **100% regenerated and regenerable** fibre made from pre- and post-consumer Nylon 6 waste materials such as production discards, industrial plastic components, oligomers, fishing nets, fabrics and spent carpets.

RECOVERED MATERIALS

These materials are recovered all over the world and undergo an **extensive depolymerization process** to create 100% regenerated ECONYL® Nylon yarn used for production of superior quality carpet tiles like INCATI. ECONYL® fibre looks like any other, but the process behind tells a different story: it is a regenerated yarn with **sustainable characteristics** that offers same mechanical and technical performances as standard nylon 6.

TO INFINITY AND BEYOND!

ECONYL® yarns **can be regenerated an infinite number of times** without any loss of quality. Used INCATI carpet tiles can be converted to secondary fuel, effectively further reducing overall CO₂ emissions. Step-by-step, tile-by-tile we move forward in our pursuit to create products with zero environmental impact and infinite regeneration!

INCATI DOES ITS FAIR SHARE FOR THE ENVIRONMENT

INCATI values the environment. We make an ongoing commitment to decrease the impact of our activities on the planet to the best of our ability.

These are some of the steps we have taken to reduce our carbon footprint:

We **recycle the waste of raw materials** unused during the production process

2500 solar panels generate 500 mW/year which represents **35% of our total electricity consumption**

Used carpet tiles are converted to secondary fuel, effectively **reducing overall CO₂ emissions**

All Nylon yarn from the INCATI tiles can be **recycled**

FOR EVERY 10,000 TONS OF ECONYL® RAW MATERIAL, AQUAFIL IS ABLE TO:

Save	Avoid
70,000	57,100
barrels	tonnes
of crude oil	of CO ₂ eq. emissions

5

As well as being a solution on waste, ECONYL® regenerated nylon is also better when it comes to climate change. It reduces the global warming impact of nylon by up to 80% compared with the material from oil.

CARBON FOOTPRINT

Tufted **polyamide top cloth** on a **polyester fleece primary backing** with a **precoat** finish for improved fibre bond

Bitumen with glass fibre scrim secondary backing, to assure dimensional stability and improve laying properties

500gr **SOUNDBLOC** polyester felt backing, to increase acoustic performance, durability and underfoot comfort

SOUNDBLOC CARPET TILES FOR IMPROVED ROOM ACOUSTICS

INCATI CARPET TILES REDUCE SOUND

As a textile, carpet is a natural sound absorber and reduces impact noise while absorbing sound within the space. All our qualities have sound absorbing properties and reduce impact noise. Several collections even reach the α_w 0,35 threshold, reducing sound up to 50%.

THE IMPORTANCE OF SOUND REDUCTION

Sound is an important aspect in many buildings. Office environments, hotels, schools and educational facilities, hospitals, nursing homes and healthcare infrastructure, in all these environments, bad acoustics and intrusive sounds can damage the functionality of the environment.

Modern office workplaces should support work optimally and provide a positive ambience to the employees, furthermore, they should encourage staff motivation and the power of concentration. Flexible office structures combined with communicative room structures meet these demands best. Create a productive environment by **improving room acoustics** with our **sound-absorbing polyester felt tiles**. Add an **extra layer of comfort** under working feet and transform offices into pleasant working spaces.

A study of the VDI (Assocation of German Engineers) puts the losses of performance due to noise and visual disturbances at 20 – 30%. Sound absorbing carpet tiles can reduce the losses of performance.

SOUND ABSORPTION

IMPACT SOUND INSULATION

A MYRIAD OF CARPET TILE DESIGNS

MYRIAD INDIVIDUAL PILE DELIVERY (IPD)

INCATI's state-of-the-art **Myriad tufting machine** - developed and built by the market leading **Cobble Vandewiele** - with its amazing **individual pile delivery** (IPD) technology, brings **unlimited design flexibility** with full pattern repeat definition to any carpet tile specification.

This **high speed** tufting machine holds hundreds of compact servomotors that control each individually the yarn ends, to achieve an endless number of pile heights.

Automated visual control systems - such as on board high resolution cameras and laserstop - create a **sophisticated quality control system** for ultimate piece of mind.

GO THE EXTRA MILE

INCATI is led by working with high-tech hardware, multiple colour palettes or yarn textures, and inspiring design styles. Additionally we have the **benefit** of offering **both modular and wall-to-wall** (4 metre wide) **flooring solutions** within one and the same collection.

MIX AND MATCH

Today's working environments or hospitality interiors feature more than just one design or colour style. Interior designers prefer a more **sophisticated** and **creative carpet look** that can be combined with hard flooring specifications. A **unique signature** to each of their projects.

At INCATI we emphasize the importance of this **modular flooring trend**. For projects **exceeding 200m²**, **special tile sizes** are made available in both bitumen or soundblock backing :

ECONYL®
ENDLESS POSSIBILITIES

ATLANTIC

18

LUXURY WITH A SUBTLE GLOSSY EFFECT

Manufactured from a six-colour solution dyed nylon (polyamide) yarn, Atlantic is developed to achieve the perfect imperfection. Through its highly textured yarn and an irregular loop pile construction, Atlantic delivers a luxurious look with a subtle glossy effect that's perfect for deluxe work and hospitality spaces. The collection showcases eight vibrant colours, while a Class 33 Commercial Heavy rating makes it perfectly suitable for heavy traffic use.

METAL-X

collection

74

A METALLIC MARVEL WITH AN URBAN EDGE

Inspired by metallic effects and urban designs, we set a new playground for interior designers. The Metal-X collection presents five design styles - Geo, Construct, Archi, Urban and Urban Brick - each in seven glimmering colourways, available in 50 x 50cm carpet tiles. Metal-X is also available to order in four-metre broadloom.

Manufactured on our state-of-the-art Cobble Vandewiele Myriad tufting machine, Metal-X is a truly artistic flooring concept that uses sustainable ECONYL® yarn in a technically superior finish. Based on all its credentials, this collection is a perfect fit for any high-end commercial environment.

MISTRAL

84

— ULTRA SOFT CANDY STRIPE

An elegant candy stripe design, Mistral is a stylish loop pile carpet tile with an exceptionally soft feel. Its silky space-dyed yarn and multi-coloured fine-line pattern, make Mistral a design feature in high traffic commercial areas that require a Class 33 use certification. Available in four striking colours, these carpet tiles are certainly full of character.

MYRAGE

collection

88

A NEW MODULAR CONCEPT FOR INSPIRING INTERIORS

Inspired by the latest design trends and technical possibilities, we've created a new modular flooring concept for interior designers in Myrage.

The Myrage collection introduces eight patterns – Carat, Claudia, Concrete, Legend, Parade, Sculpture, Sparta and Stratos - each in nine contemporary colourways. Available as standard in 50 x 50cm tiles, Myrage can also be ordered in four-metre broadloom.

Manufactured on our state-of-the-art Cobble Vandewiele Myriad tufting machine, Myrage is a truly artistic flooring concept that uses 100% solution dyed nylon (polyamide) yarn for stain-resistance and colour-fastness in a technically superior finish. Based on all its credentials, this collection is a perfect fit for any high-end commercial environment that demands a unique identity.

NORMANDY

DYNAMIC DESIGN FOR A POWERFUL FLOOR

Normandy is one of our most eye-catching and powerful carpet tile collections. Manufactured from 100% solution dyed nylon (polyamide) for stain-resistance and colour-fastness, Normandy uses a highly textured yarn in subtle and bright colour combinations.

The multi-level loop pile construction brings extra definition to the design and creates a dynamic floor effect. In a palette of 11 striking colours, Normandy works perfectly for zoning your working environments.

Available in 25 x 100cm planks, Normandy lets your creativity go wild.
